## DYWIDAG unbonded monostrand tendons for Las Vegas Hotels

### Mandalay Bay Hotel and Casino, Las Vegas, USA DYWIDAG unbonded monostrand tendons for slab post-tensioning.

For many years designers and consulting engineers in the US specify the reliable and yet simple and flexible DYWIDAG unbonded monostrand system for flat slabs. A number of new hotels in Las Vegas were constructed with reliable DYWIDAG products. The ease of installation onsite is not only an economical solution, but also provides a high level of safety for structures, which are out of the ordinary. In 1999 DSI-USA supplied a volume of 3,700 tons DYWIDAG unbonded monostrand tendons 0.5" for the flat slab post-tensioning in this region.
